

## **ASSEMBLY INSTRUCTIONS FOR ATTACHING #FDC FOLD DOWN CLIPS**

*[View from the inside of the enclosure]*

If the fold down clips are not attached to the enclosure you must first make sure the fold down clips will be connected to the *inside* of the enclosure area. Set the pen up so that it is in the shape of the pen you ordered (i.e. – a 2'x4', a 4'x4', etc.). Do not clip all the panel clips together yet; you will need to get on the inside of the enclosure. Take a #FDC Fold Down Clip and, from the inside area of the pen, place it so the flat side is facing toward the center of the pen and the curled tail part is next to the center panel bar (see photo below). Attach the fold down clip by snapping on the tail area to the center bar. The tail will hook from the underside of the center bar. Place the fold down clip on the second or third space in from the end of the panel (see photo above). Fold down the clip and you are ready to place a floor or shelf on it.
