

## **Assembly Instructions for Kali-Ko Kozy Korner #K244**

**Inventory:** The Kozy Korner #K244 consists of (5) #C48 48" high panels (1) #CD48 48" high single door panel (1) #F22 shelf (1) #C48C lid (top) (3) #250 floor divider clips (6) #FDC fold down clips (30) #200 panel clips (3) #175 door clips. (Optional floor or floor w/ wheels may be purchased.)

*Note: Please make sure your inventory is complete.*

**Step 1:** Stretch out the panels in the shape of a 2'x4' enclosure. **Do not** connect the enclosure's final panels together until the floor is installed. The floor is attached to the enclosure using (2) -#250 floor divider clips per 2 ft. section. Take (12) -#250 floor divider clips and, starting to the left of the door, snap two clips onto the floor pipe frame and the lower panel bar, two spaces from the end of the panel (*see figure 1 below*). Do this to each panel as you go around the enclosure. Connect the last panels to each other, snapping together the #200 panel clips.

**Step 2:** The inside of the panels come with #FDC fold down clips. “Fold down” these clips so they are flat. Place the #F22 shelf onto the #FDC fold down clips and attached (2) #250 floor divider clips to each side of the shelf. Shelf may go with flat side up or down. (See figure 2 below...view is from underside of enclosure with shelf's flat side up.)

**Step 3:** Finally, place the #C48C lid on top of the unit, making sure the #200 panel clips are facing down. Snap the (12) #200 panel clips in place and ‘even up’ any sides that are sagging.

**Congratulations!** You are now ready to use your Kali-Ko Kozy Korner #K244 enclosure.
