

Assembly Instructions for Kitty Kondo 2 #K344W

Inventory: The Kitty Kondo #K344W consists of (5) #C48 48" high panel (1) #CDD48 48" double door (1) #F24 shelf (1) #C48C lid (top) (30) #200 panel clips (6) #175 door clips (12) #FDC fold down clips (6) #250 floor divider clips (3) #LC locking casters (3) #NLC non locking casters (6) #CWC caster wheel clips. The panels will already have been snapped together in a chain. **Note: Please make sure all your inventory is complete.*

Step 1: If you purchased the optional floor with wheels follow the instructions enclosed for assembly of the wheels and floor. You must start by installing the wheels to the floor and then wrapping the enclosure around the floor.

Step 2: Begin by unwrapping and stretching out the panels in the shape of a 2'x4' area. The door may go wherever you choose. Snap the enclosure together with the #200 panel clips provided. **Note: If you purchased a floor without wheels you will need to place this floor (pipe side up) inside the cage area before snapping the final #200 panel clips on. Connect the panels to the floor with the #250 floor divider clips provided – attaching (2) clips near the ends of each 2 ft. panel to the floor pipe (see figure 1 below).*

Step 3: Next, 'fold down' flat the #FDC clips inside the perimeter of the enclosure. Make sure each clip is flat (the #F24shelf will rest upon these.) Place the 2'x4' #F24floor on the #FDC fold down clips and attach the floor to the enclosure's center bar with the #250 floor divider clips provided. You will snap on (1) #250 floor divider clip in the middle of each 2 ft. panel section. (see figure 2 below)

Step 4: Finally, place the #C48C lid on top of the enclosure – making sure the #200 panel clips face down. Snap the (12) clips to the upper perimeter of the enclosure and 'even up' any sides that are sagging.

Congratulations! You are now ready to use your Kali-Ko Kitty Kondo #K344W enclosure.
